

## N32P

N32P11000000M0

- 1-phase power network meter
- Universal Measuring input
- Two-line LCD display
- RS-485 digital output as standard

### PRODUCT DESCRIPTION

COMING SOON!

The new N32P distinguishes modern and easy to read LCD display, a universal measuring input, and an RS-485 digital output as standard on all products.

Two-line LCD display means it comes with built in backlighting and high contrast. There is a possibility of displaying the measured value and time simultaneously or an uncalculated quantity or unit (programme unit of measured quantity). With up to 4 alarm outputs with signalling on led diodes, working in seven different diodes. Another option is a conversion of any measured value into an analog signal 0/4...20 mA or 0...10V.

Programming can be done via keyboard or through RS-485 interface by means of the free eCon software.
