

VECTOR T3 HANDLE CENTRAL LOCKING

2752-20623110-01

Vector T3 locking handle, 12V, keyed alike 751, zinc/steel, 180°

- 12 & 24 V
- IP65
- Zinc/stainless steel
- 4mm compression
- Adjustable

PRODUCT DESCRIPTION

Vector 3 T-handle for central locking of vehicles. The unlocking and locking signal is sent from the vehicle's system. Available in versions with feedback if the T-bar handle is open or closed and if the handle is unlocked or locked.

The handle creates 4 mm of compression and is sealed to IP65 for water and dust. Four blind-mounted studs ensure watertight mounting. In the event of a power failure, the latch is equipped with a mechanical override cylinder.

Available for 12- and 24-volt systems and with fixed or adjustable roller cams, as well as 1-, 2- and 3-point locking options.
