

KUBLER SLIP RING SR060E

SR060E-25-2-3-132
SLIP RING 2 SIGNAL / 3 POWER 25MM SHAFT

- Standard slipring
- Life span 50 million revolutions
- Easily accessible contacts
- IP64

PRODUCT DESCRIPTION

SR060E is a compact slip ring for up to 3 power and 2 data transmissions from a stationary to a rotating platform. The power and data transmission takes place securely via trailer contacts.

New innovative contact materials have a long service life and extremely little maintenance during operation. The round shape with smooth surfaces and a high level of protection allow easy cleaning.

Examples of applications: packaging machines, textile machines, robots and handling equipment, rotating tables, etc.

TECHNICAL DATA

Contact resistance channel	1 Ω
Contact resistance data channel	0,1 Ω
Dielectric strength	1000 kV/m
Hollow shaft diameter max	25 mm
Insulation resistance	10 ³ Ohm(500VDC)
IP class	IP64
Life span	500000000 revolution
Power load max	16 A
Signal load	2 A
Speed max	500 m/s
Temperature operational max	75 °C
Temperature operational min	0 °C
