

ZEBRA FS70 SMART CAMERA

FS70-CM20D5-0C00W
FS70, 2.3 MP, DPM, 2D

- **Easy Setup:** The FS70 features Auto-Tune for automatic setup, ensuring consistent and reliable read rates with just one button press
- **IoT Ready:** It can send images to Zebra Savanna or other cloud services, facilitating compliance with industry regulations without the need for server management
- **Power Options:** Supports Power-over-Ethernet (PoE) for reduced setup complexity, and can also be powered via a standard 24V DC supply or USB-C
- **Customizable Scanning:** The FS70 supports various external C-mount lenses and lighting solutions, allowing for flexibility in addressing complex application requirements
- **Robust Performance:** With an operating temperature range of 32°F to 113°F and environmental sealing rated at IP65 and IP67, the FS70 is designed for durability in industrial settings

PRODUCT DESCRIPTION

The FS70 is the ultimate scanner when it comes to customization. By giving the user a variety of options, it can achieve flawless tracking in virtually any application and any environment. Choose from four image sensors and a world of C-mount lenses and lighting options. Zebra's powerful and intuitive Aurora software platform gives you a tool to easily set up, deploy and run the FS70. Through a simple purchase of licenses, advanced functions can be added to meet new needs.
