

KUEBLER - INSTRUMENT CODIX 533, 24X48 MM

6.533.012.300

CODIX 533 SETPOINT DISP 24VDC

- Signal generator; 4-20 mA, 0-10 V
- Four digits, 8 mm high
- Scalable -19,999 to 99,999
- Time Ramping or manual

PRODUCT DESCRIPTION

Codix 533 is a signal generator that produces an analogue current or voltage signal to an external set point or control signal for another device, for example, a digital "potentiometer" for speed control on a frequency converter, etc.

Codix 533 has three basic functions;

- manual, direct control ("potentiometer")
- manual ramping; value jumps to preprogrammed step
- automatic ramping; time control up to 20 values, from 0.1 sec to 999.9 min

Connection

- | | |
|----|----------------------------|
| 1. | 10-30 V dc |
| 2. | 0 V (GND) |
| 3. | 0 V (GND) |
| 4. | Hold (lock) |
| 5. | Output signal 0 - 24 mA dc |
| 6. | Output signal GND |
| 7. | Output signal 0 - 12V dc |

TECHNICAL DATA

Approvals

CE, EMC, UL

Connection

Screw connection
