

LUMEL - S4AI ANALOGUE INPUT CONVERTER - 4 CHANNEL

S4AI1100E0
 CONVERTOR 0-10V/0-20mA to RS485 230V

- Universal or Temperature Inputs
- two programmable alarm outputs
- mathematical functions
- programmable individual characteristics of the inputs
- Modbus Slave Device

PRODUCT DESCRIPTION

The S4AI is a module that can convert 4 analogue inputs, current, voltage, temperature, or resistance into digital RS-485 signals with Modbus protocol.
